## Shortcut Menu

- Format...
- Cut
- Copy
- Paste
- Delete Log Note
- Link
- Set Range Start
- Set Range End
- Synchronize Note
- What's This?

When you switch between edit mode and read-only mode the background of the log sheet changes color, and the Edit/Read-Only button changes state.

## Range Bar

### Range Start Marker

This marker represents the Audio Range start time as defined in TheRecord Player™.

### Current Log Note Marker

Indicates the last log note relevant to the current play time of the associated content. As the content continues to play the marker moves to show the corresponding log note.

### Range End Marker

This marker represents the Audio Range end time as defined in TheRecord Player.

## Location List

You can access the Location list for your log sheet by clicking

<b>Location</b>	Court 1
	<Court 1 - 1/04/2004>
	Court 3
	Court 2

If a location appears in <brackets> as shown above, that location has associated content loaded in TheRecord Player. By clicking that location you can create a log sheet linked to that content.

The Location list only appears in Edit Mode.

### To create a new log sheet:

1. Click the **New** button.
2. Enter a **Location** or **Description** as required.

*When creating log sheets it is recommended that you start TheRecord Player and open the relevant content before you start TheRecord Annotator. In this way the selection of the location name is automated.*

### To add a log note: (Edit Mode only)

1. Select the last empty **Speaker/Note** field.
2. Start typing or enter a glossary item. A time stamp is automatically entered in the time field.
3. To create multiple lines in the same field press SHIFT + ENTER at the end of each line.

### To open a log sheet:

1. Click the **Open** button.
2. Use **FTR Navigator** to navigate through **Search Folders**, **Date folders** and **Location folders** until you reveal a content type.
3. When the required content is revealed select it and click **Open**. All log sheets in the selected **Search Folder**, with the same location name and date, are opened.

### To link content:

1. Click a log note timestamp in the log sheet.
2. Annotator launches TheRecord Player and searches for matching recordings.

### To toggle between Edit Mode and Read-only Mode:

1. Click the **Edit/Read-only** button.

Common Function Keys
