DWR has included my groundwater uses in this adjudication. Groundwater should not be included.

Bayless & Berkalew lands in the San Pedro River Basin were homesteaded lands prior to statehood. The Federal government gave the homesteaders the subsurface water and mineral and oil rights when they received title.

Only "subterranean streams, flowing in natural channels, between well defined banks, are subject to appropriation under the same rule as surface streams." Howard v. Perrin, (1904), 8 Ariz. 347, 76 Pac. 460.

To appropriate as subflow inquiry must be made as to whether the drawing off of subsurface water tends to diminish appreciably and directly the flow of the surface stream. None of our wells diminish the flow of the surface stream.

DWR did not give me an early enough priority date. Livestock have been on my range (owned by my own company) since 1884, and before that cattle grazed these lands for two hundred years, according to the San Pedro River Riparian Management Plan and Environmental Impact Statement made by the U.S. Department of the Interior, Bureau of Land Management, Safford District, June 1989.

DWR has shown that my stock ponds that are located on public leased land are not owned by my company. Private investment built these stock ponds and these waters are used by my privately owned livestock that range on both public and private lands. We own these water rights.

The adjudication process in general, and the objection process in particular, is too confusing for individual water claimants to participate in effectively. My rights should not be determined or denied until a mechanism is devised to place private claimants on equal footing with the government and institutional claimants.

The small claimants have no ability to generate the funds necessary to compete with the government and institutional claimants on complex legal and scientific issues. My rights should not be determined or denied until a mechanism is devised to provide technical and legal back-up to private claimants.

Determining my rights in Maricopa County is too expensive and cumbersome for me to effectively participate. DWR and the court should arrange for local services including the ability to file papers locally, hold hearings locally, hold public workshops locally and have DWR staff available locally to answer questions.

The hydrographic survey report implies that my existing water use is the extent of my water rights. Under Arizona law I have the right to drill more wells, increase my water usage and change both the type and place of use.

DWR underestimated my current water usage and failed to recognize that my groundwater rights are much larger than my current level of usage.

- ☐ 10. I object to the **Explanation** provided for the claimed water right(s).
- ☐ 11. Other Objections (please state volume, page and line number for each objection).

REASON FOR OBJECTION

The reason for my objection is as follows (please number your objections to correspond to the boxes checked above; please attach supporting information and additional pages as necessary):

2. The claimant and/or ADWR fail(s) to associate this claim with a pre-adjudication water filing as required by Arizona statute. (SM 420)

The available historical record does not support the priority date listed in the adjudication filings. (SM 478) (SW001)

Adjudication filings associated with this WFR contain inaccurate or incomplete information. (SM 478)

The amount claimed, as described by ADWR, exceeds a reasonable amount required for beneficial use. (SM 478)

The statement of claimant lists a use not verified by DWR. (SM 478)

The use of water listed under this Watershed File Report is challenged because it interferes with downstream federal reserved rights and is contrary to state and federal law. (SM 560)

3. Adjudication filings associated with this WFR contain inaccurate or incomplete information. (SM 478)

4. According to ADWR, the Point of Diversion (POD) identified as serving the Places of Use (POU) under this WFR is currently inactive. The claimant and/or ADWR need(s) to provide information regarding the POD that provides water to the POUs. (SM 500)

8. The claimant and/or ADWR fail(s) to associate this claim with a pre-adjudication water filing as required by Arizona statute. (SM 420)

The use of water listed under this Watershed File Report is challenged because it interferes with downstream federal reserved rights and is contrary to state and federal law. (SM 560)
