W-1, W-2, W-3, W-4 (Consolidated)

Contested Case No. **W1-11-2610**

13 **ORDER INITIATING CONTESTED**
14 **CASE AND SCHEDULING INITIAL**
15 **CONFERENCE**

16 CONTESTED CASE NAME: *In re Joseph John Martinez and Joe White*

17 HSR INVOLVED: San Pedro Hydrographic Survey.

18 DESCRIPTIVE SUMMARY: The Clerk of the Maricopa County Superior Court is
19 directed to initiate W1-11-2610. Parties who wish to pursue this case are ordered to attend
20 an initial conference scheduled for **Thursday, July 17, 2025, at 10:00 am.**

21 NUMBER OF PAGES: 13

22 **This order opens a case to determine legal rights to use water.**

23 **This case is NOT being initiated because of any improper water use.**

24 **Failure to participate may result in dismissal of potential water rights.**

25 The State of Arizona is currently undergoing a General Stream Adjudication to
26 determine water use rights and to create an accurate, enforceable record of those rights. In
27 Arizona, surface water, and water pumped from some wells,¹ belongs to the general
28 public. An enforceable right to use this “appropriable” water may be acquired after review

¹ Arizona law includes wells that may be pumping surface water in the General Stream Adjudication and subject to all requirements for surface well use.

1 and approval by Arizona's General Stream Adjudication Court. This process, the "general
2 stream adjudication," is currently evaluating **PIMA COUNTY PARCEL No. 205-18-**
3 **019** for potential water rights.

4 This court order opens a case to determine rights to use water on the parcel listed
5 above, that the Cochise County Assessor has identified as owned by **Clyde Edward Reed**.
6 Current landowners who intend to pursue any potential water rights associated with this
7 case must attend the initial status conference scheduled for **Thursday, July 17, 2025, at**
8 **10:00 am**. Interested Parties **MUST** attend the scheduled initial conference if they plan to
9 pursue potential water rights. Failure to appear at the initial conference could result in the
10 dismissal of the case and the loss of water rights associated with the property. The
11 conference will be held virtually using the Court Connect program. Instructions for Court
12 Connect are attached as Attachment A.

13 14 **SUMMARY OF CASE**

15 Arizona Department of Water Resources ("ADWR") records indicate that Eliazar
16 Vindiola filed Statement of Claimant 39-1969, claiming water for irrigation use dating to
17 1975. The filing of a Statement of Claimant declares an individual's intent to claim a water
18 right and begins the process of pursuing that water right with the Court.

19 ADWR investigated the claimed water uses and issued Watershed File Report No.
20 113-09-CC-014 in 1991. After the Watershed File Report was issued, the public was
21 allowed an opportunity to object to the findings in the report if they believed that there
22 were errors or insufficient documentation. This case will determine water rights existing
23 on the property associated with the relevant Watershed File Report and resolve the
24 objections to the Watershed File Report.

25 The Court recognizes that there has been a long delay between the filing of the
26 initial documents and the initiation of this case. Because of this delay, the property may
27 have changed ownership or may have been subdivided. Nonetheless, current landowners
28 may still obtain water rights. Below is a summary of the water uses found on the property

at the time of the Report:

Use	Associated SOC(s)	Source	Place of Use
Domestic	39-1969	Groundwater	NWNWSE03 T11S, R18E
Irrigation	39-1969	Groundwater	NWSE03 T11S, R18E
Irrigation	39-1969	Groundwater	NWSE03 T11S, R18E

ADWR public records do not contain any assignments of the Statements of Claimant listed in the Watershed File Report nor do landowners appear to have filed any additional Statements of Claimant since the issuance of the HSR. Arizona law requires that for parties to obtain a legal water right, they must provide proof of their right by presenting to the Court an updated and accurate Statement of Claimant claiming the relevant water use, in addition to a matching basis of right, e.g. a statement of claim, decree, stockpond claim of right, or water right certificate. Landowners must present the following in order to acquire a water right:

- A. Evidence of past water use on their property.
- B. An accurate Statement of Claimant in their name. The current landowner may fulfill this requirement by either filing a new statement of claimant or obtaining an assignment or amendment of a preexisting statement of claimant. These forms can be found online at <https://www.azwater.gov/adjudications/statement-claimant-new-use-summons-forms>
- C. A basis of right accurately describing the claimed use. A basis of right is either a decree, a document submitted to ADWR registering a water right, or a document issued by ADWR certifying a water right. Applications for statements of claim, stockpond claims of right, permits, or water right certificates can be found online at <https://www.azwater.gov/surface-water-forms-and-documents>.

If the property owner is able to provide proof to the Court of the existence of a

1 water right on their property, the Court can recognize an enforceable water right in a “Final
2 Decree.” Ariz. Rev. Stat. § 45-257(B).

3 4 **OBJECTING PARTIES**

5 Objectors to a water right claim must present the Court with a specific statement
6 objecting to specific claimed attributes. Ariz. Rev. Stat. § 45-256(B). The following
7 entities have filed objections in this contested case: the Gila River Indian Community,
8 the San Carlos Apache Tribe, and the Yavapai-Apache Nation (collectively “the
9 Tribes”); the United States, joined by the Tribes; Magma Copper Co.; ASARCO Inc.;
10 and the Salt River Project.

11 Copies of objections in this case can be found under the respective case name and
12 number on the following website:

General Background on the Water Rights Determination Process in Arizona

A general stream adjudication is a judicial proceeding to determine the quantity and priority of all water rights in a river system. Arizona is undertaking general stream adjudications of both the Gila River and the Little Colorado River systems. A river system includes surface water flowing “in streams or other natural channels,” groundwater sufficiently connected to that surface water, and water (both surface and groundwater) subject to claims by the federal government. Ariz. Rev. Stat. § 45-251(7). Recognizing and respecting water rights and the priority of such rights is important in Arizona where times of drought or water scarcity can occur.

All cases begin with the filing of a “Statement of Claimant,” (“SOC”) in which a property owner makes a claim for a right to use surface water on their property. Ariz. Rev. Stat. § 45-254(A). This person is the “claimant.” The SOC contains, among other characteristics, a description of the source and quantity of the water used, the location of use, the location from which the water was diverted, and the date when the water was first put to use. *Id.* § 45-254(C).

After the property owner files the SOC, the Arizona Department of Water Resources (“ADWR”) prepares a “Watershed File Report,” (“WFR”) in which ADWR investigates the claims in the SOC and recommends water rights associated with the property. *Id.* § 45-256(B). ADWR compiles all WFRs for a watershed into a comprehensive Hydrographic Survey Report (“HSR”) and publishes the report for public review and comment. In response, other claimants in the Adjudication may file “objections” disputing the information or recommendations in the WFR. The individuals who file objections are called “objectors.”

This “contested case”, one of thousands in the Gila River System, will evaluate claims asserted in specific Statements of Claimant while considering objections to the WFR that reported ADWR’s initial inspection of those claims.
