CONTESTED CASE NAME: *In re St. David Irrigation District*

HSR INVOLVED: San Pedro River Watershed Hydrographic Survey Report.

DATE OF FILING: August 9, 2019

1
2 On July 15, 2019, Arizona Department of Water Resources (ADWR) provided a Report
3 and Maps concerning the watershed file reports that are included within the enlarged
4 boundaries of the St. David Irrigation District. Table 2 attached to ADWR's Report identifies
5 98¹ watershed file reports for land newly added to the St. David Irrigation District. Seventeen
6 of those watershed file reports are the subject of contested cases that have been initiated and
7 consolidated with this contested case. The potential water rights included in two additional
8 watershed file reports are the subject of proceedings in part in *In re St. David Irrigation*
9 *District* and in part in separate, independent contested case proceedings: *In re Eldon J. and*
10 *Shirley Barney*, contested case no. W1-11-1898, and *In re Max J. and Donna Kartchner*,
11 contested case no. W1-11-1986. To further the process of identifying the watershed file reports
12 and related cases that should be consolidated with this case, information is provided in
13 Attachment A about the status of the contested case related to each watershed file report listed
14 by ADWR.
15

16
17 Forty six of the watershed file reports identified by ADWR have not been the subject of
18 an initiated case. Contested cases have been initiated for the remaining 33 watershed file
19 reports that were not previously initiated and consolidated in whole or in part with *In re St.*
20 *David Irrigation District*. Twenty two cases were previously initiated as part of the
21 consolidated contested case *In re Pomerene Water Users Association*, W1-11-1676 and
22 subsequently dismissed. In 1994 and 1995, parties in 13 of the cases were dismissed based on
23 the absence of interest in water diverted or distributed by the Pomerene Water Users
24 Association. In 2018 and 2019, parties and landowners in nine cases were dismissed due to the

1 failure to file statements of claimant, appear at a properly noticed status conference or
2 otherwise indicate an interest in asserting a claim to a right to water.

3 The final 11 initiated contested cases are currently inactive. Six of those cases have been
4 stayed because wells located outside the subflow zone provide the claimed sources of water.
5 Five cases involve watershed file reports that do not have statements of claimant associated
6 with the potential water rights found by ADWR.
