ATTACHMENT 1

WFR CATEGORY 8 - PWR SUMMARY

The Salt River Project objects to the absence of an apparent date of first use for this Potential Water Right (PWR). Previous filings, where available, are the evidentiary basis for any appropriative right. This PWR has been matched to a Water Rights Registration Act (WRRRA) filing. The date claimed in the WRRRA filing should form the basis for the apparent date of first use, unless sufficient historical evidence indicates a contrary date.

The Watershed File Report fails to articulate sufficient historical evidence to refute the priority date claimed in the WRRRA filing matched to this PWR. In the absence of such evidence, the apparent date of first use assigned to this PWR should be the date claimed in the WRRRA filing (0910). This objection applies to: SW005.

* * * *

The Salt River Project objects to the apparent date of first use assigned to this Potential Water Right (PWR). Previous filings, including certificates of water right and Water Rights Registration Act (WRRRA) filings, are the evidentiary foundation for the date of priority associated with a water right. Where a PWR is matched to both a certificate of water right and a WRRRA filing claiming a date prior to June 12, 1919, the priority date set forth in the certificate should form the basis for the apparent date of first use, unless sufficient historical evidence indicates a contrary date.

The Watershed File Report fails to articulate sufficient historical evidence to refute the priority date set forth in the certificate of water right matched to this PWR. In the absence of such evidence, the apparent date of first use should be the date set forth in the certificate (0920). This objection applies to: SW001.

WFR CATEGORY 9 - QUANTITIES OF USE

The Salt River Project objects to the failure of DWR to assign a quantity of use to this Potential Water Right (PWR). All water rights subject to the court's jurisdiction must be quantified in accordance with A.R.S. § 45-257(B). This PWR is no exception (1010). This objection applies to: SW001 and SW005.

* * * *

The Salt River Project objects to the failure of DWR to calculate a diversion rate for this Potential Water Right (PWR). All PWRs assigned a point or points of diversion should be assigned a separate diversion rate for each point of diversion. Diversion rates should be calculated at the point of diversion and should include conveyance losses (1010). This objection applies to: SW001.
