

APPENDIX:

ABSTRACTS OF PROPOSED WATER RIGHTS

Silver Creek Watershed

Little Colorado River Adjudication

Office of the Special Master, Arizona General Stream Adjudication

April 20, 1994

The following appendix is a compilation of proposed water rights for Group 1 (stockpond, stockwatering, and wildlife) watershed file reports. Each abstract is enclosed in a box. The double lines which border the top portion of the box indicate the mandatory characteristics needed for a water right. In the lower portion of each abstract, single lines border characteristics which are not mandatory, but will be used if requested by the water user. The first column lists the individual elements of the right. The second column lists the Master's determination for such water right element. The third column summarizes the basis of the Master's decision.

These abstracts reflect settlements between the landowners, lessees, and objectors. They also reflect the principles set forth in the memorandum decision. Where appropriate, explanatory text is provided.

The term "Agreement" is often used in the third column. This refers to the agreement made by the litigants about the characteristic of a water right, as reported in the pretrial statement. When the basis of the decision is reported as an "Uncontested Fact," it means that none of the parties disputed the characteristic, and it appears as reported in the WFR. Finally, a characteristic may be determined by the "Memorandum Decision" and its holdings.

The final pages of this appendix, pp. 116-119, contain a list of instances where no water right is awarded and an explanation is given for each instance.

NO WATER RIGHT AWARDED
Silver Creek Watershed
Little Colorado River Adjudication
Office of the Special Master, Arizona General Stream Adjudication
April 20, 1994

| WFR No. | Statement of Claimant No. (if any) | Name of water use | Potential Water Right (if any) | Reason for not awarding a water right |
|------------|------------------------------------|--|--------------------------------|--|
| 033-50-007 | 39-89428 39-89429 | Pinedale Ranger Station (Groundwater/ Windmill Well) | DM001 | Stay per request of SRP and Aztec Land & Cattle Co. pending resolution of Issue #2 in the Gila River Adjudication. Stay granted during trial of June 15, 1993. |
| 033-50-007 | None | Cottonwood wash | SP017 | Claim withdrawn by US, <i>see</i> Pretrial Order dated May 28, 1993. |
| 033-50-007 | None | Cottonwood wash | SP019 | Claim withdrawn by US, <i>see</i> Pretrial Order dated May 28, 1993. |
| 033-50-007 | None | Cottonwood wash | SP020 | Claim withdrawn by US, <i>see</i> Pretrial Order dated May 28, 1993. |
| 033-50-007 | None | Maxwell Tank | None | Claim withdrawn by US, <i>see</i> Pretrial Order dated May 28, 1993. |
| 033-50-007 | None | Groundwater/ Windmill Well | None | Listed in pretrial statement, page 67, as providing stockwatering use. It appears to be the same well as for the Pinedale Ranger Station, and there is no explanation of this use in pretrial statement or in trial proceedings. No apparent statement of claimant and no apparent prefilings exist if this is a use other than Pinedale Ranger Station. |
| 033-51-001 | No apparent filing | Linden Windmill | None | In the pretrial statement, page 71, the parties stipulate to move Linden Windmill from WFR No. 033-51-003 to WFR 033-51-001. However, the statement that "there is no potential water right number (PWR) assigned to Linden Windmill because it is a well" is not enough to grant a water right without further basis. |

|------------|------------------------------------|-------------------|--------------------------------|---|
| 033-51-001 | 39-91756 | Perkins Tank | SP010 | This tank was originally reported in WFR No. 033-50-073 (Ronald Perkins, land-owner). The U.S. Forest Service and Mr. Perkins filed a stipulation with the court that this pond was located on U.S. Forest Service property and should be included in WFR No. 033-51-001 as SP010. <i>See</i> Minute Entry dated December 9, 1992, Case No. 6417-033-0031. This right will be adjudicated if the U.S. Forest Service can provide appropriate prefiling documentation as a basis of the right. A search of DWR's records indicates that the only filing for this use is the statement of claimant filed by Mr. Perkins. The U.S. Forest Service has until June 1, 1994, to provide such evidence of prefiling to the Department of Water Resources in order for an adjudication of the stockpond to occur. |
| 033-51-001 | 39-90183 | Thistle Well | None | This water use was identified in the pretrial statement, page 13. No right is awarded at this time, but the litigants may request further proceedings to establish basis of right. <i>See</i> Memorandum Decision, Section III(D)(1), regarding the adequacy of a well registration filing as the basis of a water right. |
| 033-51-001 | 39-90180 | Fools Hollow Well | None | This water use was identified in the pretrial statement, page 14. No right is awarded at this time, but the litigants may request further proceedings to establish basis of right. <i>See</i> Memorandum Decision, Section III(D)(1), regarding the adequacy of a well registration filing as the basis of a water right. |
| 033-51-001 | 39-90182 | Lone Pine Well | None | No apparent filing in the WFR with the same location, but the name matches this statement of claimant. This water use was identified in the pretrial statement, page 15. No right is awarded at this time, but the litigants may request further proceedings to establish basis of right. <i>See</i> Memorandum Decision, Section III(D)(1), regarding the adequacy of a well registration filing as the basis of a water right. |

| 033-52-031 | 39-90064 39-90065 | Silver Creek to Sam Jones Tank or Homestead Tank | SP003 | <p>This tank is reported in WFR No. 033-52-034. The same tank was also reported in WFR No. 033-52-031. It appears that one stockpond was reported two times. The physical location of the tank places it in WFR No. 033-52-031. <i>See</i> Transcript of Proceedings, pp. 14-19 (Nov. 16, 1993).</p> <p>DWR may use this information to create abstracts for WFR No. 033-52-031. | 033-56-070 | 39-86969 39-88352 | Navajo County Park Instream Flow Claim | WL001 | The statements of claimant were withdrawn prior to the trial. <i>See</i> Pretrial Statement, p. 72. |
| 033-57-006-SP001 | 39-87046 | Pinyon (Pinon) or Schoolhouse Tank | SP001 | This stockpond is related to WFR No. 033-52-034. The owner of this WFR is the U.S. Forest Service with Harvel Penrod and W.D. Photon listed as lessees. <i>See</i> Exhibit No. BRU-004. Because the lessees have not been noticed, this stockpond should be adjudicated with the rest of WFR No. 033-57-006. Exhibit No. Bru-011 may be used by DWR to create abstracts for WFR No. 033-57-006. |
